

Alexandre Loupy, MD, PhD
Professor of Nephrology and Epidemiology

Date of Birth: 21/07/1977 (44 years old), Reunion Island, France
2 Rue de l'Amiral de Joinville – 92200 Neuilly-sur-Seine

INSTITUTION	DEGREE	YEAR	FIELD
Descartes University, Paris, France	HDR*	2015	Epidemiology and Biostatistics
Descartes University, Paris, France	PhD#2	2014	Epidemiology and Biostatistics
Genetic Center University of Alberta, Canada	Post doc	2012	Genetics
Pierre et Marie Curie University, Paris, France	PhD#1	2011	Cell biology
Descartes University, Paris, France	M.D	2008	Nephrology

**Clearance to conduct research and lead a research team*

1. Personal Statement

Trained in Internal medicine, qualification in Nephrology, intensive care and transplantation
Transdisciplinary research skills (PhDs in biostatistics and in basic science)
Thesis director (3 Alumni, 6 on-going thesis) – Affiliated to 2 Doctoral schools of Public Health (ED 393) and Biology (BioSPC, ED157)
Research focus theme in the past 10 years directed toward precision diagnostics in transplantation, risk prediction, risk stratification, alloimmune response, organ rejection, Integrative epidemiology and biostatistics
Director of the Paris expertise center for organ transplantation: a multiorgan transplant network in France comprising 9 institutions for a total of 8,000 patients. Coordinating (2020) 32 people within the network (scientists, M.D's research assistants) (http://www.paristransplantgroup.org)
Coordination of international studies and head of the scientific committee of the Banff international allograft classification. Research grants, investigator, patents & clinical trials (see chapters 3, 4 and 6)

2. Positions

2023: Director of the Paris Institute for Organ Transplantation and Regeneration (PITOR)

2020: Appointed Adjunct Professor at Cedars Sinai, UCLA, Los Angeles, California USA

2017: Appointed Professor of Nephrology and Epidemiology, Necker Hospital, Paris, France

2015: Director of the Paris Expertise Center for Organ Transplantation (website), French National Medical Research Agency INSERM U970 Team 11 ATIP AVENIR. Paris, France

2013: Associate Professor in Nephrology: Kidney Transplant department, Necker Hospital, Paris, France

2011: Assistant Professor in Nephrology: Kidney Transplant department, Necker Hospital, Paris, France

2010: Assistant Professor in Cardiology, Pompidou Hospital, Paris, France

2002: Resident in internal Medicine, Paris Hospitals, France

3. Mobility, Scholar Societies, Editorial Activities

Mobility

- Genomic center ATAGC Kidney Transplant Department; University of Alberta, Prof Phil Halloran (2011 – 2012)
- Comprehensive Transplant Center UCLA – Cedars Sinai, Los Angeles, CA, USA: annual 1-month short stays (2015,16,17,18,19)

Scholar Societies and Awards

- 2023: INSERM Innovation Award
- 2023 : Victor & Erminia Mescles Award
- 2023: [Laureate](#) of the Senior Innovation Chair of the Institut Universitaire de France
- Award of the ESOT European Society for Organ Transplantation (most impactful research team, 2017, 2019, 2021)
- 2021: MIT & Stanford University: Challenges and Opportunities in Organ Allocation
- 2021: US National Academies of Sciences –committee. (February, 5, 2021)
- 2020: Paul I Terasaki Clinical Sciences Award
- 2018: French National Academy of Medicine Award: prix de Académie de Médecine
- 2017: Clinical science investigator award: American Society of Transplantation
- 2015: French Society of Nephrology Award
- 2009: Young Investigator Award: European Society for Organ Transplantation
- 2008: Laureate of the gold medal of Paris Hospitals (APHP)

- 2022 – KDIGO Expert
- Expert for the FDA (2015, 2018, 2019)
- 2015 – Present: Appointed Scientific Director of the International Banff Classification

Member of the French Society of Nephrology (SFT), the European Society for Organ Transplantation (ESOT) and the American Society of Transplantation (AST) and international society of transplantation (TTS)

4. Patents and Clinical Trials

Patents & Softwares

- 2020 : Development and validation of a virtual biopsy system in kidney transplant patients (Request 20 305629.6)
- 2019 : Method of predicting whether a kidney transplant recipient is at risk of having allograft loss (Request 19 305 348.5, PCT/EP2020/058029)
- 2017 : Methods for predicting acute rejection in heart recipients (EP3119904 (A1))
- 2020 : Biopsy contextualization Software (IDDN.FR.001.250020.000.S.P.2020.000.31230)
- 2018 : iBox software (IDDN.FR.001.450013.000.S.P.2018.000.31230)

Clinical trials (PI)

- [NCT04416256](#): COVID-19 Pandemic and Worldwide Organ Procurement (2020)
- [NCT04258891](#): Multidimensional System to Dynamically Predict Graft Survival After Kidney Transplantation (2020)
- [NCT04226859](#): Trajectories of Glomerular Filtration Rate and Progression to End Stage Renal Disease After Kidney Transplantation (2020)
- [NCT04117152](#): Trajectories of Cardiac Allograft Vasculopathy After Heart Transplantation (2019)
- [NCT03723668](#): Kidney Transplant Outcome and Organ Acceptance Practice Pattern: A Nationwide Analyses in the US and France (2018)
- [NCT03652402](#): Precision Risk Stratification in Kidney Transplant Patients - EU-TRAIN (2018)
- [NCT03582436](#): Rejection Diagnosis in Kidney Transplants Patients (2018)
- [NCT03474003](#): Development and Validation of a Multidimensional Score to Predict Long-term Kidney Transplant Outcomes (2018)
- [NCT03466775](#): Anti-Angiotensin II Type 1 Receptor Antibodies and Kidney Transplant Outcomes (2018)

- [NCT03438058](#): Complement-activating Anti-human Leucocyte Antigen Donor Specific Antibodies in Solid Organ Transplantation (2018)

5. Editorial Activities

- Associate Editor for *Transplantation* 2014 - 2018
- Associate Editor for *American Journal of Transplantation* (2016 - present)
- Member of the editorial board of *Kidney international* (2020 - present)
- Referee for the following journals:
 - o NEJM, Nature Medicine, The Lancet, JAMA, Circulation, BMJ
 - o American Journal of Transplantation, Kidney International, Plos Medicine
 - o Journal of the American Society of Nephrology

6. Main Grants obtained in the past 5 Years

2023: [H2020 Biotool-CHF](#) (AI and analytics leader). This project funded for 9.6M€. aims at developing a prognostic system to personalize pharmacological approaches in congestive heart failure.

2022 : [H2020 Eu4health](#) : AI and analytics leader

2021 – [Prix Émergence en Recherche 2021 IdEx Université de Paris](#) (A. Loupy PI)
The molecular microscope strategy for precision diagnostics in heart transplant rejection

2021 – [Prix Émergence ville de Paris](#) (A. Loupy PI)
Development of Contextualization Tools in Kidney Transplantation using Artificial Intelligence : the iBox system and beyond

2020 – [Prix des Innovateurs Ile De France](#) (A. Loupy PI)
To develop the iBox system by adding a functionality for the standardization of care practices. We thus propose to implement in the iBox application a functionality of clinical and care protocols. This tool for practitioners will be an additional help in medical decision making and will reinforce the clinical utility of the iBox by homogenizing care practices.

2018 – [iTransplant](#): intelligence artificielle pour une médecine de précision (A Loupy co PI). 1.8 K€

This project will build the biggest European cohort of transplant patients with high phenotypic value and will study and put together traditional risk factors and innovative biomarkers of transplant rejection in order to generate a dynamic system

of precision diagnostic and stratification of rejection/allograft loss based on machine learning strategies.

2018 - [H2020 EU-TRAIN](#): The European TRANsplantation and INnovation consortium for risk stratification in kidney transplant patients (A Loupy PI). 6,100 K€.

The goal of this project is to develop an integrated risk-stratification and prognosis system (EU-TRACER) to improve graft survival in kidney transplantation. This system will be converted into clinical actionable information for the clinician to monitor individual risk prediction (3, 5, 7, 10-year allograft loss). The project involves 7 European transplant centres in France, Spain, Switzerland, Germany and 2 industrial partners (Oxford Immunotec and Cerner)

2017 - [ANR KTD-innov](#): Kidney Transplant Diagnostics innovation (A Loupy PI). 8,400 K€

Engineering a diagnostic system for precision medicine in kidney transplantation. This project aims at providing a solid algorithm tool to the clinician for rejection diagnosis. The project was funded by the French ANR (National Research Agency) and the consortium involves 7 French referral transplant centres and 2 industrial partners (Cerner and Sebia)

2016 - [National French Research Agency \(INSERM\) ATIP Avenir research team](#) : 1 post-doctoral fellow funded and a functioning grant of 330K€ over 5 years (A Loupy PI)

7. Publications and Scientific Communications

7.1 PhD Thesis in Science

PhD #1 (Basic Science): "PTH-independent regulation of blood calcium concentration by the calcium-sensing receptor" (1 related article published as first author in JCI)

PhD #2 (Epidemiology - biostatistics): "Risk prediction system for prediction allograft failure: population approach" (3 articles published as first author in Lancet, NEJM and BMJ)

7.2 Selected Publications and metrics
